1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/20/05 has been entered.

2. Claim 26 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The further limitation of this claim is that the oligonucleotides are PCR primers. However, as "PCR primers" refers to an "intended use" of the oligonucleotides and does not in any way further limit the prior oligonucleotides as far as physical or structural properties, the claim is objected to. In other words, a PCR primer is already an oligonucleotide, and "intended use" limitations are not given weight in claims to a product.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 29, 31, and 43-51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) Claims 29, 31, 43, and 51 are confusing because of the language "such as", as the scope cannot be determined. The phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

B) Claims 29, 31, 43, and 51 are further confusing because of the language "paleospecies", "species hybrid", "agamospecies", and "ecosystem species". These terms do not appear to be well known in the art, nor are they defined in the specification. Thus, it cannot be determined what species of organism is/are encompassed by these terms. Clarification is required.

Art Unit: 1637

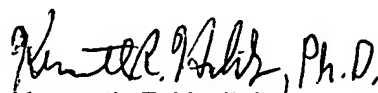

C) Claims 44-51 are confusing because of the language "is used by the apparatus to determine the data" in claim 44, as this limitation is directed to a method while the claims are drawn to an apparatus. Thus, it is unclear how the apparatus is intended to be further limited. It is suggested that this phrase be deleted, as it would be sufficient to recite in the claim that the patentable set of oligonucleotides as set forth in claim 16 is attached to the apparatus.

4. Claims 6-9, 11, 14-19, 21, 24, 27, 28, 30, and 32-42 are allowable. Claims 26, 29, 31, and 43-51 are free of the prior art, but are objected to or rejected for other reasons.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth R. Horlick whose telephone number is 571-272-0784. The examiner can normally be reached on Monday-Thursday 6:30AM-5:00 PM.
